

Subhanshu Jha

Frontend Engineer — JavaScript — React.js — Next.js — TypeScript

+91-9599719631 | subhanshujha001@gmail.com | LinkedIn | GitHub | ChatSOP

EXPERIENCE

Software Engineer — Full Stack (Frontend Ownership)

Jul 2025 – Present

LP Fintech

Noida, Uttar Pradesh

- Architected and developed a **multi-tenant SPA** using React.js, TypeScript, reusable component libraries, dynamic theming, and Permission-based rendering, enabling multiple enterprise clients to operate from a shared codebase with isolated branding and data contexts.
- Improved **Largest Contentful Paint (LCP)** by **40%** through code splitting, lazy loading, React Hooks optimization (useMemo, useCallback), asset compression, and API payload reduction, contributing to improved Core Web Vitals performance.
- Implemented secure authentication and authorization workflows using **JWT, RBAC, automatic token refresh mechanisms**, and frontend session management.
- Collaborated with backend engineers on API contract design and integration planning, reducing production API mismatch issues by more than **60%**.
- Introduced automated linting, formatting, and Jest-based unit testing for critical UI components, improving code quality and reducing regression defects.

Software Developer Intern

Aug 2024 – Nov 2024

Adhipa Technologies

Remote, India

- Built and maintained a **30-page React.js admin dashboard** featuring GraphQL subscriptions, reusable UI components, role-based access control, and complex state management workflows.
- Reduced unnecessary React component re-renders by **45%** through component memoization, optimized data-fetching strategies, and efficient rendering patterns, improving responsiveness under heavy data loads.

PROJECTS

ChatSOP — Production AI SaaS Platform | *React.js, Next.js, TypeScript, Node.js, WebSockets, RAG* | chatsop.in

- Designed and shipped a **production-grade SaaS platform** using React.js, Next.js, TypeScript, responsive UI principles, and scalable frontend architecture, enabling businesses to deploy AI-powered customer support agents.
- Implemented a complete **Retrieval-Augmented Generation (RAG)** pipeline including website crawling, document ingestion, semantic embeddings, vector search, prompt engineering, context retrieval, and grounded response generation.
- Developed real-time chat functionality using WebSockets with human-agent takeover, AI-generated suggestions, subscription-based feature gating, and embeddable widgets for integration across multiple platforms.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit, React Hooks, Material UI, Tailwind CSS, HTML5, CSS3, Responsive Design

Backend: Node.js, REST APIs, GraphQL, WebSockets, PostgreSQL, MongoDB

AI: Retrieval-Augmented Generation (RAG), Prompt Engineering, Semantic Embeddings, Vector Search

Tools: Git, GitHub, Docker, Turborepo, CI/CD, Jest, Postman

Practices: Agile/Scrum, Code Reviews, Accessibility (WCAG), Core Web Vitals, Performance Optimization

ACHIEVEMENTS

- Smart India Hackathon (SIH) — Rank 1 at College Level
- LeetCode — 340+ Problems Solved — Rating: 1800+

EDUCATION

Guru Tegh Bahadur Institute of Technology

2021 – 2025

Bachelor of Technology (B.Tech), Information Technology

CGPA: 7.97
